

(with Permit and distributed
at Pre-Construction Mtg.)

NOTICE

Beginning July 1, 2000, failure to maintain sediment control measures will result in the issuance of a Notice of Violation ("NOV") with a maximum compliance time of 48 hours. If the violation is not corrected within 48 hours of NOV issuance, a Stop Work Order ("SWO") will be issued.

The SWO will affect **ALL** construction within the area covered by the sediment control permit including building permits (not just the land disturbance activity on site). Building inspection requests will not be scheduled, and contractor/subcontractors must cease work until the DPS inspectors approve the site. Each day that the violation exists constitutes a separate offense by law, and Civil Citations may be issued daily until corrections are met.

The sediment control permit and plan clearly require that the permittee perform regular inspection and maintenance of all erosion and sediment control measures on site. If you have any questions regarding this procedure, please contact the Sediment Control Inspector in your area or Bruce Payne at 240-777-6344.
